Tip for 2008

3M

**It's Official! Our
Manufacturer E.
Woods is now 3M E.
Woods headquarters
for 3M Liquid Coating
and Protection
Products.**

2008 Tip of the Year: As you are making your new years resolutions, remember; it is better to focus on a few goals and objectives that are very important to you and your team, rather than get bogged down with too much planning. A successful business consultant for Andrew Carnegie of US Steel said, "Just have your key managers and personnel focus on 6 objectives a day."

Have mold and Mildew been ringing in the New Year on your floors, walls, or ceilings? MRSA infections reports are on the rise. Are your working and living surfaces protected against infectious growths? No? Don't worry! Our staff trumps your staph, hands down!

See what your preferred 3M/Thortex Corrosion and Protection applicator and stocking distributor did for a local Banquet and Restaurant kitchen to eliminate a problem using our 3M's Floor Tech PR.

Are you more concerned with acid or other chemical attacks in your battery room floors or containment areas? Worried about your primary and secondary chemical containment systems? EPA laws and expensive fines too much to handle? Unconventional Solutions has your solution!

See what we did for this Power plant:

We want to thank you for your business in 2007, and hope you feel free to call us with anything we can do better in 2008. We are committed to earning more of your business this year! We are even bringing on a NACE Certified Coating Inspector. May you and your company have a very profitable 2008 with the support of myself and the team at Unconventional Solutions Inc.

Sincerely,

Doug Klingensmith
