Department of Agriculture on your back?

Save Your \$\$\$\$\$

June is the Month to Order! Rising fuel costs are causing shipping charges to double! Place your order before these prices go up!

Worried about the EPA and changing environmental laws concerning primary and secondary containment of hazardous chemicals? Wanting to avoid costly fines? USI can Help with our **3M** Chemical Protection Systems.

3M's Chemi Tech UC was chosen over 20 competitive products to repair this Power Stations secondary containment area.

We can show your team how to make cost effective repairs to your secondary and primary containment areas. Short on time? Have us recommend a qualified 3M trained contracting team!

Don't forget to specify **3M** Thortex in your next:

- Structural Steel Project
- Pipe Repair or Protection
- Clarifier or Bag House
- Concrete or Floor Protection Project

Do you know the 3 things to look for when selecting a coating for Corrosion and Chemical Protection?

If not, call us at **(248)685-7580** to have a Technical Consultant or a NACE Inspector give you the maximum performance and give you the lowest life cycle cost on many of your major projects

Tip of the Month

Father's Day is always the 3rd Sunday in June. Don't forget to make June 15th a special day for your dad or any of the fathers you know! You can never spend too much time with your parents as I know they unfortunately won't be around forever.

Sincerely,

Doug Klingensmith
