

Notice your tanks are corroding? Frustrated by rising heating cost and the cost of maintenance? Concerned with the reliability or efficiency of your condensate tanks or heat exchangers? Upset because you really don't want to have to buy new? Mad at the cost of buying new? Under pressure to meet your budget? Look what we did below to help out a plant in Flint, Michigan:

This project was inspected by one of our experienced technical consultants, Ron Anderson who has over seven years of coating experience. Ron specified 3M Chemi-Tech UC, because of the elevated temperatures the tank would see in service. He also recommended a qualified applicator giving the customer the complete solution they desired.

We have many solutions to meet your needs:

- **3M Chemi-Tech 152LV**-This Lloyds of London Approved ballast tank coating is also the one that performed #1 in an independent Shell Oil Test.
- **3M Chemi-Tech EP**-Economical Epoxy Chemical Protection System. Solvent free to offer long-term protection to steel and concrete structures.
- **3M Chemi-Tech CR**-High performance epoxy chemical protection system, solvent free protection for steel and concrete including water tanks, containment areas and concrete subject to chemical attack
- **3M Chemi-Tech USR**-Ultimate Epoxy solvent resistant system. Provides protection to surface subject to solvent attack, sodium hypochloride and bleach.
- **3M Chemi-Tech UC**-Ultimate Epoxy Chemical Protection, Provides excellent protection to steel and concrete subject to aggressive acids, solvents and industrial chemicals.
- **3M Cerami-Tech HTX**-High Temperature Corrosion Protection System. Prevents corrosion for high temperature immersion. Ideal for oil/gas separators, heat exchanges and other high temp application
- **3M Cerami-Tech FG**-Prevent erosion/corrosion damage on pipe bends, elbows, pump impellers. Valve discs and bodies, condenser boxes, condenser tube sheet surfaces pump casing and other equipment and structures

*Don't forget you can improve the abrasion resistance, impact resistance, and chemical protection by post-curing our systems for 24 hours after full cure at 212F or 100C. This will give you optimum results & long-term results you desire.

Customer Feedback on 3M Pipe Repair Systems (Formerly Thortex):

- Worked Great! -Gary at a Sugar Mill
- It fixed a live 50 psi pipe.-Oakland County Drain Commission
- It saved us \$1 Million in down time.-AL at an Aluminum Smelting Plant

Tip of the month: November kicks off the start of the holiday shopping season and is great time to remember and be with family and loved ones. Do yourself a favor and enjoy the season and this time of Thanksgiving. Road rage or being rude while shopping never does you or others any good. Facts show rage causes high blood pressure and many accidents each and every day. So give thanks for living in the United States of America. We thank you for your business and customer loyalty; remember that freedom is never free, so thank our veterans as well.

ATTENTION: Customer Training ... 9:30 AM to 3 PM Thursday, December 4th at Bakers of Milford! Looking to get the best from you chemical and corrosion protection projects? Get the most out of your investment and deliver optimum results by attending our **3M** Corrosion Protection Products, Lunch & Learn. Reserve your seat today for just \$645 and get our engineering repair kit for FREE a \$645 value. So you get a double win. ..Valuable training and an engineering repair kit. Our Engineering Repair Tool-Boxes are great value by themselves, and they give you chance to enhance your career and help your company to make hundreds of cold weld or polymer repairs to metal machinery, equipment, leaking pipes and flexible components. Purchase order or credit cards are accepted and enjoy a famous Bakers Burger or other free lunch. Contact your local technical consultant today or call our office at **(248)685-7580** as seating is limited to the first 40 reservations. Hope to see you there!
