## “Change”

At Unconventional Solutions we embrace change. As the seasons are changing from summer to fall, we are here to help you change your expensive replacement costs to alternative Repair & Protection solutions that help extend the life of your equipment, machines, buildings, or structures instead of replacing them.

Want to find out more on how USI & 3M Innovation can help you in these changing times? Call us at **(248) 685-7580** to schedule a Lunch & Learn or a corrosion audit to see how we can help your company embrace change and grow profits for your stockholders.

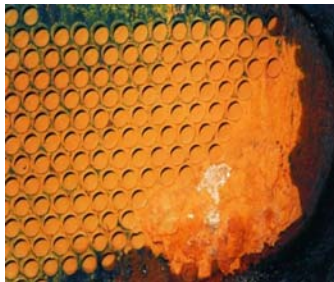

To the right is an old rusty door being protected with Chemi Tech 152LV. Prevent salt attack on your manually prepared doors and doors frames with Chemi Tech 152LV. Shield them from the harsh winter affects of rock salt and calcium chloride today!

Before

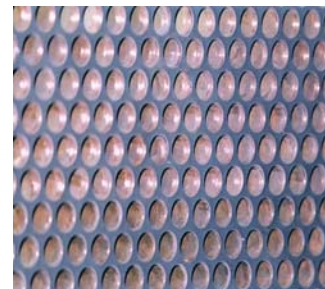

After

The tube sheet of this heat exchanger had deteriorated to a very poor condition due to the extreme heat and bi-metallic corrosion.

Metal Tech EG and Cerami Tech FG were used to rebuild and protect the tube sheet. The surface was blast cleaned prior to the application. The equipment was quickly put back into service.

## Where to find USI in September:

- NAPSRC Conference, September 15- Indianapolis, IN
- Ohio Corrosion Meeting, September 16 - Bellville, OH
- Looking Ahead to October- Doug will be speaking at the Eastern Area NACE Conference on October 5-8 - Pittsburgh , PA

Hope to see you at one of these events!

Sincerely,

Your Unconventional Solutions Team
