2009

Are you inside more often and noticing cracks on your floor coatings? Is acid destroying your floor or are you worried about trip hazards? Do you need to reduce your risk caused by worker injuries? We can help at USI with our total turn key solutions for damaged concrete and flooring.

See below what we did in just 3 days at a candy factory in Northern Indiana over Thanksgiving weekend. This system consisted of Floor Tech RS, Floor Tech SP Primer, and Floor Tech HB with aluminum oxide aggregate. The aluminum mixed with the ceramic enhancement of Floor Tech HB made this a heavy duty, acid resistant, long term repair.

Citric Acid attacking the previous coating and concrete

Troweling on the Floor Tech RS.

Finished project protected with Floor Tech HB

## Thoughts from the President

1. Oil & Gas Customer: Ask about our New Visco Elastic Coatings, Sealants & Tapes that stick to anything with minimal prep, even Yellow Jacket Pipe which coatings and tapes will not. It is also A Polar so it will repel water and is non-shielding. It can be used on Pipes, Flanges, Tank Chimes and preventing water seepage into vaults. Email us today for more detail at [office@unconventionalsolutions.biz](mailto:office@unconventionalsolutions.biz)
2. Power Plants, Steel, Sugar and Paper Mills: Need to avoid time off the grid or unscheduled down days? Ask about our new large diameter Metal Tech PR (Pipe Wrap that can seal low pressure active leaks in just minutes. Call Tiffany or Colleen at (248) 685-7580 for more details or to place an order.
3. Facilities Manager, Maintenance Superintendents and Proper Owner: Our mistake is your good fortune. Floor-Tech RS is an excellent floor repair and quick return to service non-seditious concrete repair product for trip hazardous or damaged concrete that can be returned to service in 8 hours and give you over 12,000 psi. During our job at the candy factory the installer opened too many buckets and although they have not been used and have been resealed we can no longer sell them as new. So you can save \$90.00 on a 25 kg kit that cover 19 sq ft by calling the office today at (248) 685-7580 or faxing a PO # to (248) 684-0255. Quantities are limited so don't miss out on this once in life time offer by taking action now.

We can't say it enough, but we want to thank you for your business in 2009. In these rough times is has been a great year thanks to people like you who want to repair and protect your equipment and assets to avoid expensive replacement costs.

May you have a very joyous Christmas and Holiday Season and a prosperous 2010.

Merry Christmas and Happy Holidays,  
Your Unconventional Solutions Team
