

## USI Introduces Peat Sorb, The Oil Extinguisher™

Are you aggravated with oil and petroleum spills? Do looming EPA fines have you tossing and turning at night? Are you tired of the "poop and scoop" method that doesn't really finish the job?

### USI has the solution!

Peat Sorb™ picks up any hydrocarbon on contact, virtually instantly, and renders it harmless to the environment.

#### Advantages over clay-based absorbents:

- Environmentally friendly, formulated from very specific naturally occurring vegetation
- Picks up a full range of petroleum products from crude oil to gasoline and has been used to solidify and absorb resins, PCB's, coal tars, fatty acids, and hydrocarbon-based inks
- Repels water (hydrophobic) but has the ability to absorb hydrocarbons on contact, lock them up and not release them back into the environment.
- Equally effective on land or water
- Non-leaching
- *Effective vapor suppressant*
- *Certified SEG Incinerable*
- *30%-50% savings over clay type methods*

Want to see Peat Sorb™ in action?

Call 248.685.7580 to schedule your FREE on-site demo.

## Customer Kudos

"I used Metal Tech EG to repair a shaft on one of our critical fans. It was in a hot location, and I didn't want to send the shaft out for repair. The repair was easy mixing and spreading, but time was limited by the heat curing it. Sanding was a breeze to get it down to the size we needed, and I had the fan back up and running in about 8 hours."

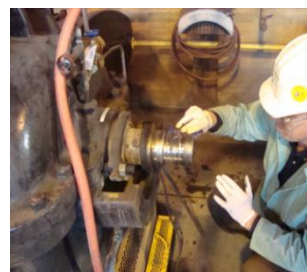

-Darrell Ery, Guardian Industries

## Got Training?

### Invest in your most valuable asset- people!

Invite us on site for a "Donut Demo" or "Lunch & Learn" session to update your maintenance and engineering team on the latest technologies in repair and protection of your vital machinery and equipment. Custom repair solutions and proper training will help alleviate the stress and frustration of high labor costs, waiting on parts, and unexpected downtime. Call 248.685.7580 to schedule your training session today!

## THOUGHTS FROM THE PRESIDENT

Unfortunately, leaky pipes, worn machinery, and forced outages are a fact of life. Are you prepared for an emergency? Our *Power & Mining Repair Kit* is a great place to start. It includes fast-curing metal and rubber repair compounds, a heavy-grade ceramic paste with excellent abrasion resistance and much more! Call our office at 248.685.7580 for details!

Doug Klingensmith  
USI President
